

Good' Ai.

Good work.
More life.

Brand guide

September 2026

The feeling we leave people with

Go on. Knock off early.

Good'AI helps business owners get repetitive work out of the way, so they can get more of their day back.

Reassuring, capable, plainspoken

Talk about missed calls, copied details and follow-ups. Say what the system does and where people stay in control.

Words to keep close

“We'll sort it.”

“What's eating your week?”

“Let's take work off your plate.”

The wordmark

The primary wordmark consists of the word "Good" in a dark olive green serif font, followed by an apostrophe and the letters "Ai." in a rust-colored serif font. The period at the end of "Ai." is also rust-colored.

Primary

Dark olive lettering with rust punctuation.
Use the supplied outlined SVG or transparent PNG.

Reversed

Paper lettering on dark olive.
Use the single-colour version for small marks.

Give the mark breathing room

Leave at least half the capital G height on every side. Keep it at least 120 px wide digitally or 25 mm in print.
Preserve its proportions.

Paper, ink and a little sunshine

Three voices, each with a job

Manrope

More life.

Wo ll sort it.

The clear everyday voice

Headings, body copy, buttons and prices.
Regular for copy, Medium for headings,
SemiBold for labels.

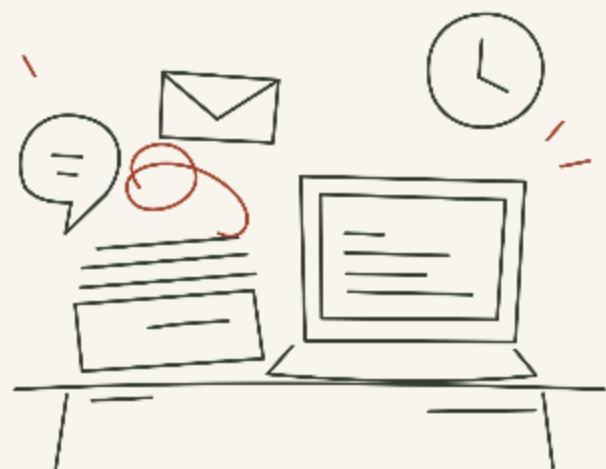

Fraunces Italic

A short expressive phrase in a headline.
Keep the surrounding copy in Manrope.

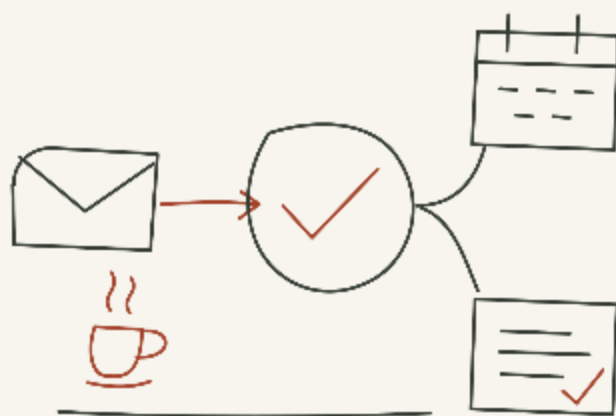

Vibes

Brief handwritten reassurance.
Keep instructions and small text in Manrope.

Draw the work out of the way

The work piles up

The pieces connect

The afternoon is yours

Loose olive linework, a few rust accents and plenty of paper. Drawings follow the meaning of the copy.

A clear next step

Let's take work
off your plate.

Try the voice agent

Short supporting line: "Want one for your business?"

Primary enquiry

Use rust with paper text.
Ask for one useful next step.
Link to the shared business enquiry
form.

Experience the service

Keep the demo visible, with the
enquiry action close by. Let visitors
choose when to start a call.

Your Canva setup

01 Fonts and logos

Add the included fonts to your Brand Kit where your plan allows. Upload the logo SVGs or PNGs. The outlined logos work without font substitution.

03 The editable guide

Import GoodAi-Brand-Guide.pptx into Canva. Check the text, line breaks and font choices after import. The PDF is a visual reference.

02 Colours

Add the four main HEX values from this guide. Use paper as the default page background and rust for the action you want people to take.

04 Images and space

Use warm natural light, ordinary objects and room to breathe. Add real founder and workflow photography as it becomes available.
